

Connected Tennessee's BTOP-funded "Preparing Tennessee's Next Generation for Success" project has done just that.

Since its launch in 2010, the program has:

- ★ Awarded more than 4,000 computers to youth in need across the state
- ★ Impacted all 76 of the state's Boys & Girls Clubs
- ★ Provided computers to more than 1,400 foster youth aging out of the Department of Children's Services program
- ★ Allowed the Boys & Girls Clubs in Tennessee youth to complete nearly 43,000 hours of computer training
- ★ Reached all 95 counties in Tennessee

And that's only the beginning. Throughout the life of the grant, the program will impact the lives of nearly 60,000 vulnerable youth across the state of Tennessee!

We invite you to visit our website at www.connectedtn.org to meet some of our recipients and see the impact of the program in our brand new documentary, available to you from the "Video" section of the "What We're Up To in Tennessee" tab on the homepage.
